National University of Ireland Galway, Galway, Ireland**

Measuring outcomes in randomised trials: developing, appraising and using core outcome sets

This course is aimed at those interested in both developing core outcome Sets in trials, as well as those who want to use available core outcome sets effectively. This one day course will explore;

- Why and where do we need core outcome sets?
- What is COMET, what is COMET doing to help, and how can you join in?
- How should core outcome sets be developed?
- Finding and appraising a core outcome set for your research.
- Do core outcome sets work?

Prof Declan Devane

Scientific Director, Health
Research Board – Trials
Methodology Research Network

Prof Paula Williamson

Professor of Medical Statistics at
the University of Liverpool, Chair of
the MRC- NIHR – Trials Methodology
Research Partnership, UK

Dr Karen Matvienko-Sikar

Health Research Board ARPP Research
Fellow, School of Public Health,
University College Cork

Schedule

- 09.30-10.00 Registration (tea/coffee)

- 10.00-10.45 Why and where do we need core outcome sets

- 10.45-11.30 What is COMET, what is COMET doing to help,
 and how can you join in?

- 11.30-11.45 Break

- 11.45-13.00 How should core outcome sets be developed?

- 13.00-14.00 Lunch

- 14.00-15.00 Finding and appraising a core outcome set for your
 research

- 15.00-15.30 Do core outcome sets work?

- 15.30-16.00 Open discussion
