

**WEBINAR**

**2nd November  
2pm (GMT+1)**

## Why ITT analysis is not always the answer for estimating treatment effects in clinical trials

**Dr Alan Phillips**

Senior Director, Biostatistics  
ICON Clinical Research

Dr. Phillips is Senior Director Biostatistics providing consultancy services to the Pharmaceutical Industry. Prior to this role, he was Vice President Head of Biostatistics for ICON Clinical Research where he directed and managed the global biostatistics resources based in US, Europe and Asia Pac. With over 35 years of experience in biostatistics, Dr. Phillips has extensive knowledge of clinical trials, statistical methodology and world wide statistical regulatory requirements. Prior to joining ICON, Dr. Phillips was with Wyeth Research for over 12 years and served as Senior Director, Clinical Biostatistics. Subsequently Dr Phillips has both CRO and Pharma experience.

Dr Phillips has experience of regulatory submissions in Biosimilars (Rituximab, Herception), CNS (depression, insomnia, Generalized Anxiety Disorder), Cardiovascular (Hypertension), Oncology (Breast Cancer) and Women's Health (Hormone Replacement Therapy, Oral Contraceptives). Dr. Phillips frequently represents sponsors at US and EU scientific advisory and approval meetings.
